The Credit Infrastructure Layer for Stablecoin Capital

The **Stripe**, of global **Trade Finance**…

The Team that Delivers Results...

Lee Tarone Embury CEO

Co-Founder
Former Harlow Butler + Prebon Tullets + FX swaps commodities + Trade Finance

Steve Jernigan CFO

Co-Founder
Fund Manager + Former CDO - Goldman Sachs Exec Capital Markets + Structured Credit

Marc Robinson COO

Co-Founder
Former COO - Coinbase , Head ops - Bitmex, SBI, Fortris. digital assets + payments

Bill Matthews CTO

Co-Founder
Technical specialist in Ai/ML and security

TradFi doesn't scale.
So we built the layer to fix it.

Trade finance is a $30T market.

Stablecoins are programmable dollars.

We connect them.

Problem

Capital can’t reach trade.

$3T+ unfinanced.

$27T slow and manual.

6-week cycles. High friction.

$300B+ stablecoins sitting idle.

Yield chasing risky DeFi.

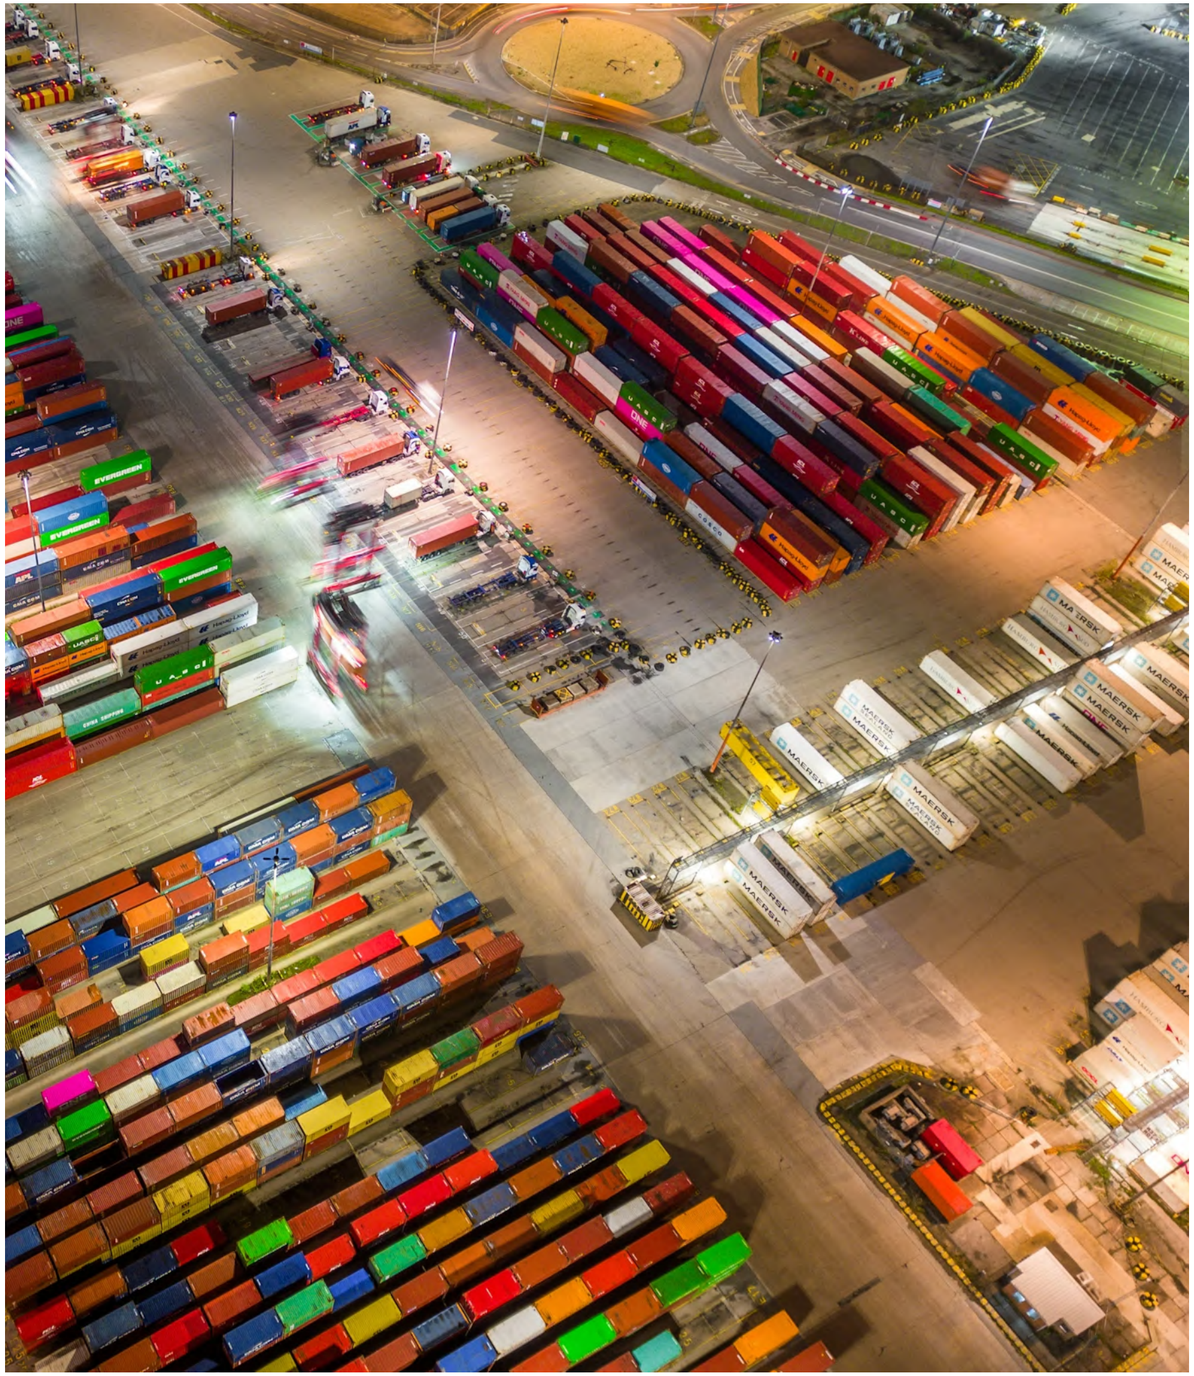
The Gap

Real-world credit demand.

Digital capital supply.

No bridge.

paperless



Solution

We turn non-performing stablecoins into yield-bearing, legally enforceable credit infrastructure.

paperless

Why Now...

The rails are finally here.

Stablecoins = instant global settlement.
Tokenisation = programmable ownership.
Legal structuring = enforceable claims.
Institutions = ready for compliant yield.
Ai Agents = Automation

This wasn't possible 5 years ago.
Now it is.

Why We Win

- Legal enforceability (bankruptcy-remote structures)
- MLETR-compliant digital trade documentation
- Curated originators (<0.02% acceptance)
- Embedded insurance (P&I structures)
- AI-driven underwriting + auto settlement
- Short-duration, self-liquidating assets
- Institutional KYC/AML rails

Anyone can mint a token.

Very few can originate, structure, and service compliant credit + knows the industry...

paperless

Risk Contols

Real yield. Controlled risk. Risk Playbook.

- Legally enforceable claims
- P&I Club insured
- less than 0.1% curated Originiators
- MLETR Legally Compliant
- Bankruptcy-remote structures
- Short-duration exposure
- Diversified pools
- On-chain transparency
- Institutional KYC/AML
- Redemption gate Infrastructure

paperless

Revenue Model

We make money per major transaction moment

- Origination fee
- Structuring / underwriting fee
- Servicing fee
- Yield spread
- Payments / FX/ Settlements

More volume = more revenue.

Automation = high margins.

paperless

Competition

Competitor	Core Function	Founded	Status / Funding	Valuation	The Gap (Our Opportunity)
Paperless	Trade Finance Ai settlement Rail	2025	Seed	$10m	Ai processing settlement layer
Shield	Exporter Settlement	2020	$2m -$7m (6 months)	$35m	Exporter Settlement Rail
Ondo Finance	Tokenized Treasuries	2021	$24m (equity) $22m (ICO)	$525m	DeFi T-Bills
Komgo	Trade Finance settlement Rail	2018	$29m	$150m	$1bn daily processing
ClearEye	Trade Ops AI	2019	$9.5m	$40m	Software
Enigio	Digital Docs	2012	$8.6m	$35m	Trade documents
Happy Robots	Supply chain AI	2023	$11m - $44m (8 months)	$500m	SCM
Opentrade	Trade Layer	2023	$4m - $11m (5 months)	$50m	RWA stablecoin yield

The Inevitability

Stablecoins **will** exceed $1T.

Capital **will** demand real yield.

Trade finance **will** digitise.

Ai +Tokenisation **will** Scale.

The winner **becomes** the default yield rail.

We are building that rail.

paperless

Traction

- Signed LOIs $250m
- Signed LTV $40m
- Pipeline of $1B
- 4 originators pipeline
- 16% average yield
- 30-90 day average dealflow
- Live pilots TBC

Achievements

- Davos 2025 speaker / participants
- Abu Dhabi department of Economy and Economic Development - sandbox
- ADGM + World Economic Forum - Trade Tech participants
- United Nations representatives on paperless trade, supply chain + global digital finance.
- Google Startup Accelerator recipients.

Strategic Partnerships

WORLD ECONOMIC FORUM

UNITED ARAB EMIRATES MINISTRY OF ECONOMY

دائرة التنمية الاقتصادية
DEPARTMENT OF ECONOMIC DEVELOPMENT

ESCAP Economic and Social Commission for Asia and the Pacific

ADGM

ITFA

Google for Startups

TradeTrust

TFDinitiative

paperless

Early opportunity:

- LPs (capital into trade)
- Fund issuers (white label products)
- Program operators (strategic)
- Distribution partners

(convertible options)

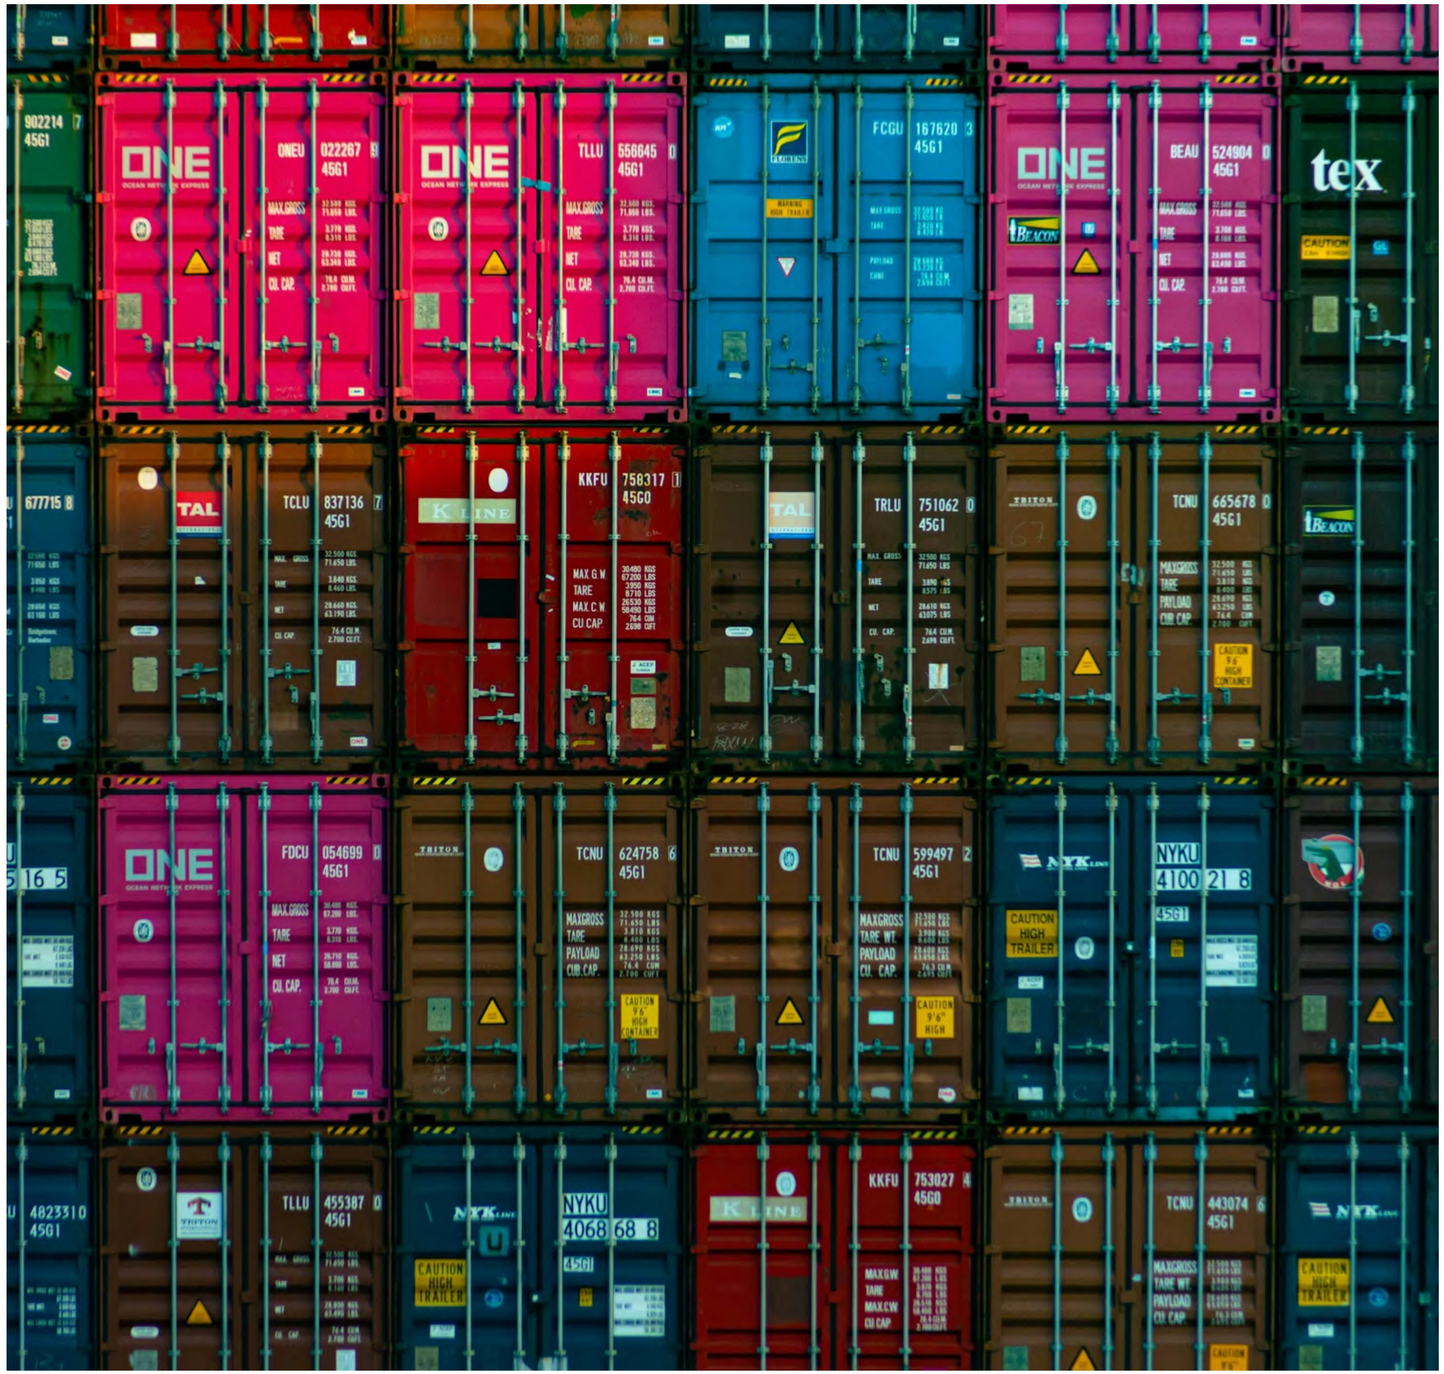
The Ask:

$2M Equity / Token Hybrid

$20 liquidity Pool (TVL)

Use of Funds

- AI & Infrastructure (Build) — 45%
- Liquidity & Partners (Scale) — 30%
- Narrative & Attention (PR) — 15%
- Capital Network (Scale) — 10%



The future of yield is real-world,
autonomous + on-chain.
We are building the infrastructure that makes it possible...
